

AMENDMENTS

IN THE CLAIMS:

Please amend claims 1, 19, 22, 31, 49, 50 as follows:

Sub 1 1. An address system comprising:
means for monitoring information sent by a sender and asynchronously received at a fee address associated with a mail recipient;
Sub 2 means for determining a fee for the information, wherein the fee is based upon a preferences record defined by the mail recipient;
means for collecting the fee from the sender into a first account;
means for forwarding the information to a private address; and
means for transferring the collected fees to a second account.

Sub 1 19. An address system comprising:
means for monitoring information sent by a sender and asynchronously received at a fee address associated with a mail recipient;
means for determining a fee for the information, wherein the fee is based upon a preferences record defined by the mail recipient and the fee is conditional;
means for collecting the fee from the sender; and
means for forwarding the information to a private address.

Sub 1 22. A method of providing a fee address system comprising the steps of:
receiving information sent by a sender at a fee address in a computer, wherein the fee address is associated with a mail recipient;
determining a fee for the information, wherein the fee is based upon a preferences record defined by the mail recipient and the fee increases as information size increases;
collecting the fee from the sender; and
forwarding the information to a private address.

Subs B4

31. A programmed computer for providing a fee address system comprising:
a memory having at least one region for storing computer executable program code; and
a processor for executing the program code stored in memory, wherein the program code
includes:
code to receive mail sent by a sender to a fee address associated with a mail recipient;
code to determine a fee for the mail, wherein the fee is based upon a preferences record
defined by the mail recipient;
code to collect the fee from the sender into a first account;
code to forward the mail to a private address; and code to transfer the collected fees to a
second account.

Subs B549

349. Computer executable software code stored on a computer readable medium, the
code for providing a fee address system, comprising:
code to receive a communication sent by a sender to a fee address associated with a mail
recipient;
code to determine a fee for the communication, wherein the fee is based upon a
preferences record defined by the mail recipient;
code to collect the fee; and
code to forward the communication to a private address.

As

50. A method of providing a fee address system comprising the steps of:
receiving mail sent by a sender to a fee address in a computer wherein the fee address is
associated with a mail recipient;
determining a fee for the mail, wherein the fee is based upon a preferences record defined
by the mail recipient;
collecting the fee from the sender into a first account;
forwarding the mail to a private address; and
transferring the collected fee to a second account.
